<https://github.com/sazzad4677> • Dhaka, Bangladesh

SUMMARY

AI-native full-stack engineer with 4+ years of building React, Next.js, and TypeScript products. Rebuilt a legacy .NET ERP frontend while working directly with its users, and set up its GitHub Actions CI/CD. Built WebRTC video consultations for a telemedicine platform. Builds with Cursor, Claude, and Codex every day, and has shipped LLM features with OpenRouter and the Vercel AI SDK.

SKILLS

Core: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, REST APIs, WebSockets (Socket.io), MongoDB, Mongoose, Redis, Docker, GitHub Actions, AWS, WebRTC, Jest

Familiar: PostgreSQL, Prisma, GraphQL, OpenAPI (Swagger), Redux Toolkit, Zustand, Vite, Python, Linux

AI & Development Tools: OpenRouter, Vercel AI SDK, Ollama, Cursor, Claude, Codex

Languages: Bangla (Native), English

PROFESSIONAL EXPERIENCE

MyMedicalHub International, *Software Engineer* Mar 2024 – Dec 2025 | Mohakhali, Dhaka, Bangladesh

- Owned the modernization of the patient-doctor video consultation experience, replacing **Vonage/OpenTok** with an in-house **WebRTC** solution.
- Improved application performance through frontend optimization, **code-splitting**, and Next.js SSR strategies.

Buyonia Bangladesh Limited, *Software Engineer* Apr 2022 – Mar 2024 | Mohammadpur, Dhaka, Bangladesh

- Rebuilt a legacy **.NET ERP frontend** using React, Next.js, and TypeScript across Finance, Merchandising, and User Management.
- Worked directly with client users to translate reported problems and business requirements into features and reusable components.

PROFESSIONAL PROJECTS

WebRTC Video Consultation Module - MyMedicalHub International

Tech Stack: Next.js, TypeScript, Node.js, WebRTC, Socket.io

- Designed the real-time consultation flow between patient and provider portals using **WebRTC**.
- Implemented **Socket.io signaling** to coordinate peer-to-peer video sessions.

AI-Assisted Physical Assessment Module — MyMedicalHub International

Tech Stack: MediaPipe, JavaScript/TypeScript, React, Computer Vision

- Built a camera-based physical assessment workflow using **MediaPipe Pose landmarks** to track patient body positions during guided assessments.
- Matched detected body landmarks against predefined assessment poses to identify incorrect positioning and provide **real-time feedback**.
- Provided step-by-step pose instructions and notified patients when their positioning did not match the expected posture.

ERP Modernization — Buyonia Bangladesh Limited

Modules: Finance, Merchandising, User Management

Tech Stack: React, Next.js, TypeScript, .NET Core, GitHub Actions, AWS

- Rebuilt the legacy **.NET ERP frontend** across Finance, Merchandising, and User Management using React, Next.js, and TypeScript.
- Integrated **.NET Core APIs** and established component-based data flows to replace legacy full-page reloads.
- Set up **GitHub Actions CI/CD** for automated testing and production deployments to **AWS**, replacing manual deployment workflows.

ERP Component Library — Buyonia Bangladesh Limited

Tech Stack: React, Next.js, TypeScript, Tailwind CSS

- Built a reusable **Figma-based component library** used across the ERP application to standardize UI patterns and accelerate frontend development.
- Developed reusable components to improve **UI consistency and maintainability** across the ERP application.

AI PROJECTS

AI Inventory Analytics & Restock Assistant

Tech Stack: OpenRouter, Node.js, MongoDB, Next.js

- Integrated **OpenRouter** with the openai/gpt-oss-120b:free model to analyze inventory and stock data and generate proactive insights.
- Generated AI-powered recommendations to identify **restocking needs** and support inventory management decisions.

AI-Powered Developer Portfolio

Tech Stack: Next.js 16, React 19, TypeScript 6, Tailwind CSS 4.2, OpenRouter, Vercel AI SDK

Live: sazzad.dev · **Code:** github.com/sazzad4677/Portfolio

- Built a production-ready developer portfolio with an integrated **AI assistant**, responsive UI, and optimized rendering architecture.
- Achieved **100/100/100/100 Lighthouse scores** across Performance, Accessibility, Best Practices, and SEO through rendering, critical-path, and semantic HTML optimizations.
- Implemented **structured data**, dynamic sitemap generation, and accessible HTML landmarks to improve SEO and search visibility.

AI Portfolio Chat Assistant

Tech Stack: OpenRouter, Vercel AI SDK, Next.js, TypeScript

- Built a real-time AI chat assistant using **OpenRouter** and the openai/gpt-oss-120b:free model to answer questions about professional experience, skills, projects, and certifications.
- Provided the model with **structured portfolio context** and custom system prompts to generate context-aware responses for visitors.
- Implemented real-time response streaming with the **Vercel AI SDK** for an interactive chat experience.

PERSONAL PROJECTS

Smart Inventory & Business Intelligence System

Tech Stack: Next.js 16, TypeScript, Node.js, Express.js, MongoDB, Mongoose, Redis, Socket.io, OpenRouter, Docker, Jest

Live: smart-inventory.sazzad.dev · **Code:** github.com/sazzad4677/Smart-Inventory-System

- Built an enterprise-style inventory management platform with real-time stock, order, and activity updates using **Next.js, Express.js, MongoDB, Redis, and Socket.io**.
- Implemented secure authentication with **NextAuth.js v5**, JWT rotation, invite-only enrollment, role-based access control, and Redis-backed rate limiting.
- Built a comprehensive Jest test suite with **>95% statement coverage** across authentication, inventory, order workflows, business logic, and activity auditing.
- Containerized the frontend, backend, MongoDB, and Redis services using **Docker** for consistent development and production environments.

AWARDS

Employee of the Month — Buyonia Bangladesh Limited · Aug 2023, Sep 2023

PROFESSIONAL DEVELOPMENT

Phitron AI/ML Course, *Phitron*

Oct 2026 – Present

Focus: Python for AI/ML, Machine Learning, Deep Learning, and AI/ML projects

Forward Deployed Engineering Career Track, *Poridhi*

May 2026 – Present

Focus: Agentic & Software Engineering, Platform Engineering, System Design, and AI-driven engineering workflows

EDUCATION

MSc in Computer Science, *Jahangirnagar University*

Jun 2023 – Dec 2024 | Dhaka, Bangladesh

BSc in Software Engineering, *Daffodil International University*

Jan 2017 – Jan 2022 | Dhaka, Bangladesh
